

# CONSULTING

## INFORMATION, SERVICES OFFERED AND RATES

The National Federation of Community Broadcasters offers consulting services that provide customized support tailored to the specific needs of community media.

Our services range from details to big picture -- from template and tool development for day-to-day operations to on-site workshops, strategic planning, and meeting facilitation. We know this industry and have been in the trenches. We can go beyond traditional consulting services with our education resources and hands-on training. Whether your station needs involve your board, staff, volunteers, or everyone, our expertise is in helping you articulate and achieve your goals so your station thrives.

### FACILITATION/TRAINING

An NFCB team member helps create a framework and plan for making improvements in organizational policies, strategies, and outcomes. Implementation support and program evaluation are services we can also offer under this umbrella.

**\$80/hour, NFCB members / \$150/hour, non-members**

### PREPARATION

Every station has specialized requests. For every hour of training/facilitation, we'll factor in time for research and preparation tailored to your needs. NFCB focuses on understanding your critical issues and opportunities before we start, so that we make the most of your time and save you the expense of getting up to speed.

**\$50/hour, NFCB members / \$75/hour, non-members**

### IN-TRANSIT

We understand that these services are a precious investment for you. We reflect that in a travel rate for any in-person training.

**\$30/hour**
